

## **Sandbox Hosting by PCA**

### **PCA offers the following sandbox hosting services:**

- Creation of a Sandbox as a dedicated triple-store instance hosted on a server managed by PCA.
- Services to access the sandbox as follows:
  - SPARQL Query (public read access to sandbox and/or PCA and other public RDL)
  - SPARQL Update (private restricted access to sandbox only)
  - File Upload (private restricted access to sandbox only)
- For private restricted areas, one user name and password will be provided. The sandbox will be named after the relevant business entity, project or group.

### **Contact information required:**

- Contact person:
- Email address:
- Representing business entity, project or group :

### **Data population:**

- By default the sandbox triple store will be empty. The customer may populate the sandbox using the upload and update services provided.
- Optionally the customer request PCA to populate the sandbox from existing RDF file(s) provided by the customer.

### **Terms of Service**

- PCA will provide the sandbox service as part of RDS Operations Support Services.
- Pricing shall be according to existing PCA service level agreements for the business entity, project or group involved.
- PCA reserves the rights for updates and restarts of the server.
- Restarts will be announced in advance and PCA will endeavour to minimize any such disruption.

### **Ownership of Content**

- Sandbox owner shall honour copyright and licensing where already asserted by content originators. Copyright of sandbox content may otherwise be asserted by the sandbox owner.

- Where this is not the case copyright is asserted by PCA. This copyright is asserted, in order to protect that content from abuse of the content-use licensing terms.
- Content use shall be freely licensed for use by any user.
- Free licensing terms include passing that license freely to subsequent users of all copied and derived content.
