

Column A	Heading in the EqHub data sheet. Not relevant for the mapping.	
Column B	An identifier for the "Attribute" to simplify identification and referencing. Not relevant for the mapping.	
Column C	Status code for mapping. Total 146 items.	
	X	Existed from Stage 1 (20)
	N	Added during Stage 2 (108)
	Updated	From Stage 1 to Stage 2 (3)
	Hold	Clarification required (8)
	Stage 1	Additional mappings from Stage 1 (7)
Column D	EqHub "Group of classes" Grouping not relevant for the mapping, but the entries are the subjects for the mappings.	
Column E	RDL Property Class #. The PCA Id for the actual EqHub "property".	
Column F	RDL Property Class Name. The PCA Designation for the actual EqHub "property".	
Column G-AI	EqHub product class. The entries from line 5 and onwards indicate if the "attribute" is applicable for the actual "product class"	
	d	Document reference. Yellow entries have been mapped, lavender entries are pending.
	p	Property. Yellow entries have been mapped, lavender entries are pending.
Column AJ	An indication if the entries for the "values" are to be taken from a list of standard "values" for validation.	
Column AK	A typical entry for a valid "value". Bright green entries have a corresponding entry in the RDL.	
Column AL	A proposed "guideline", i.e. a "user friendly version" of the formal definition of the relevant PCA RDL instance.
