practical solutions

part of the Web

part of the Web of data

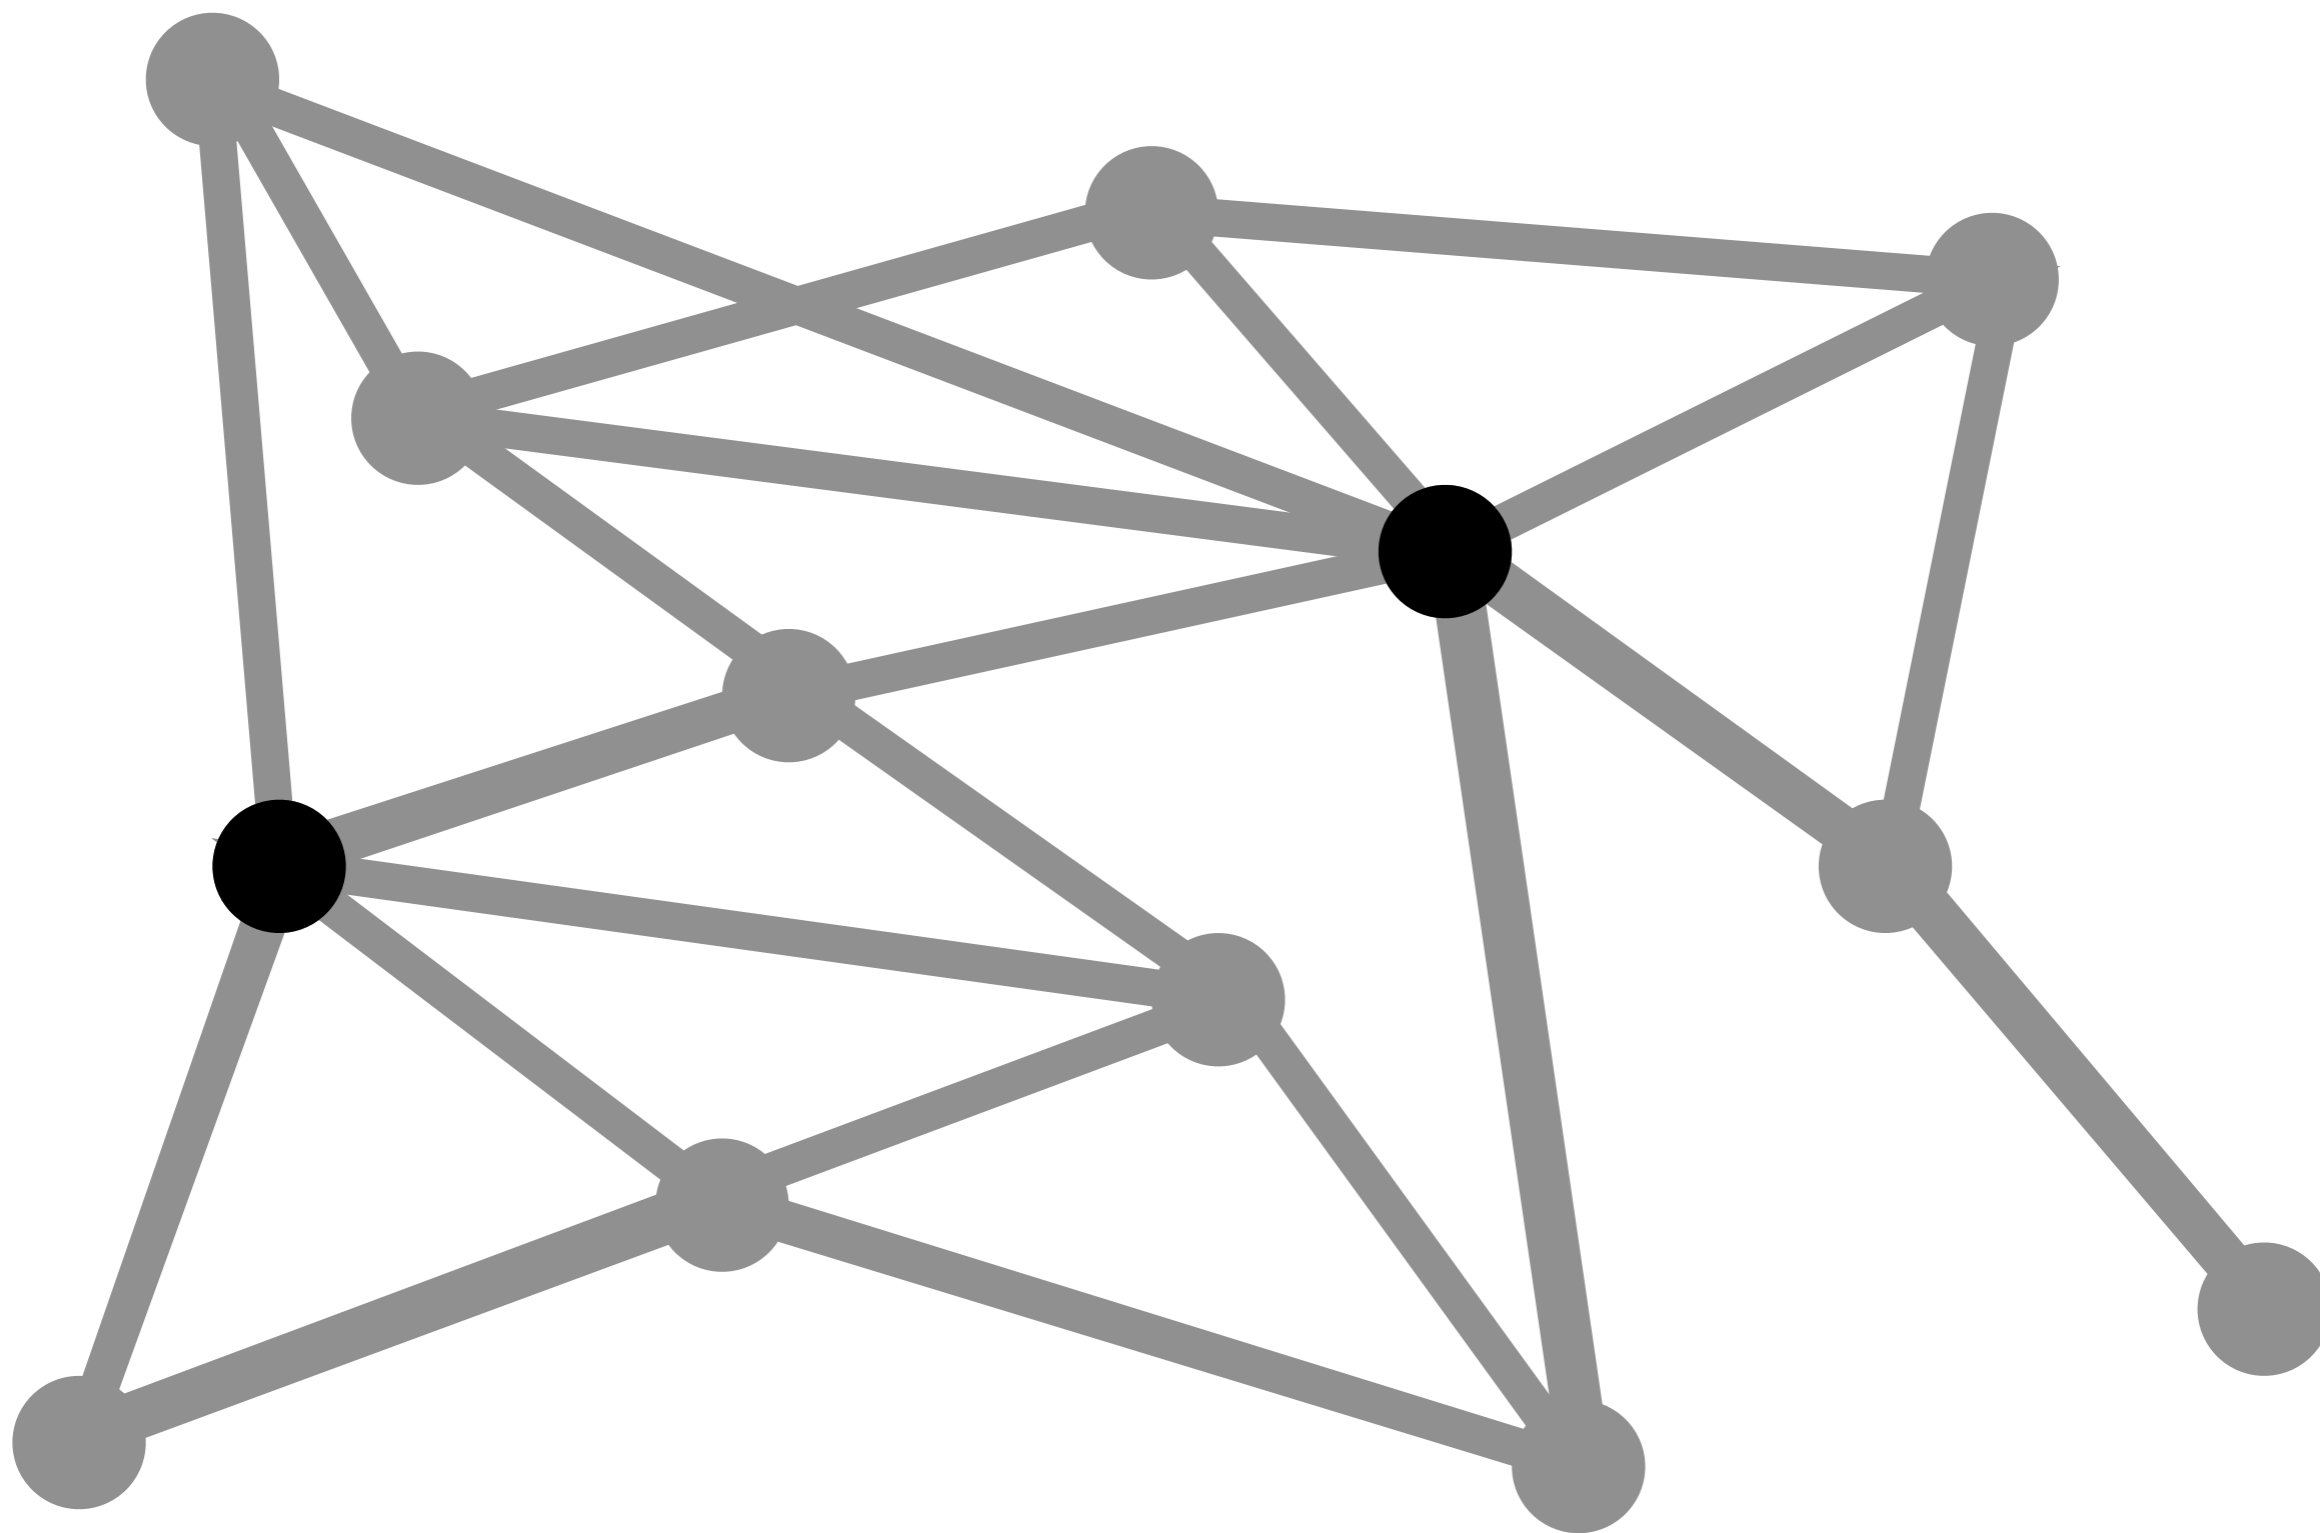

controlled vocabularies

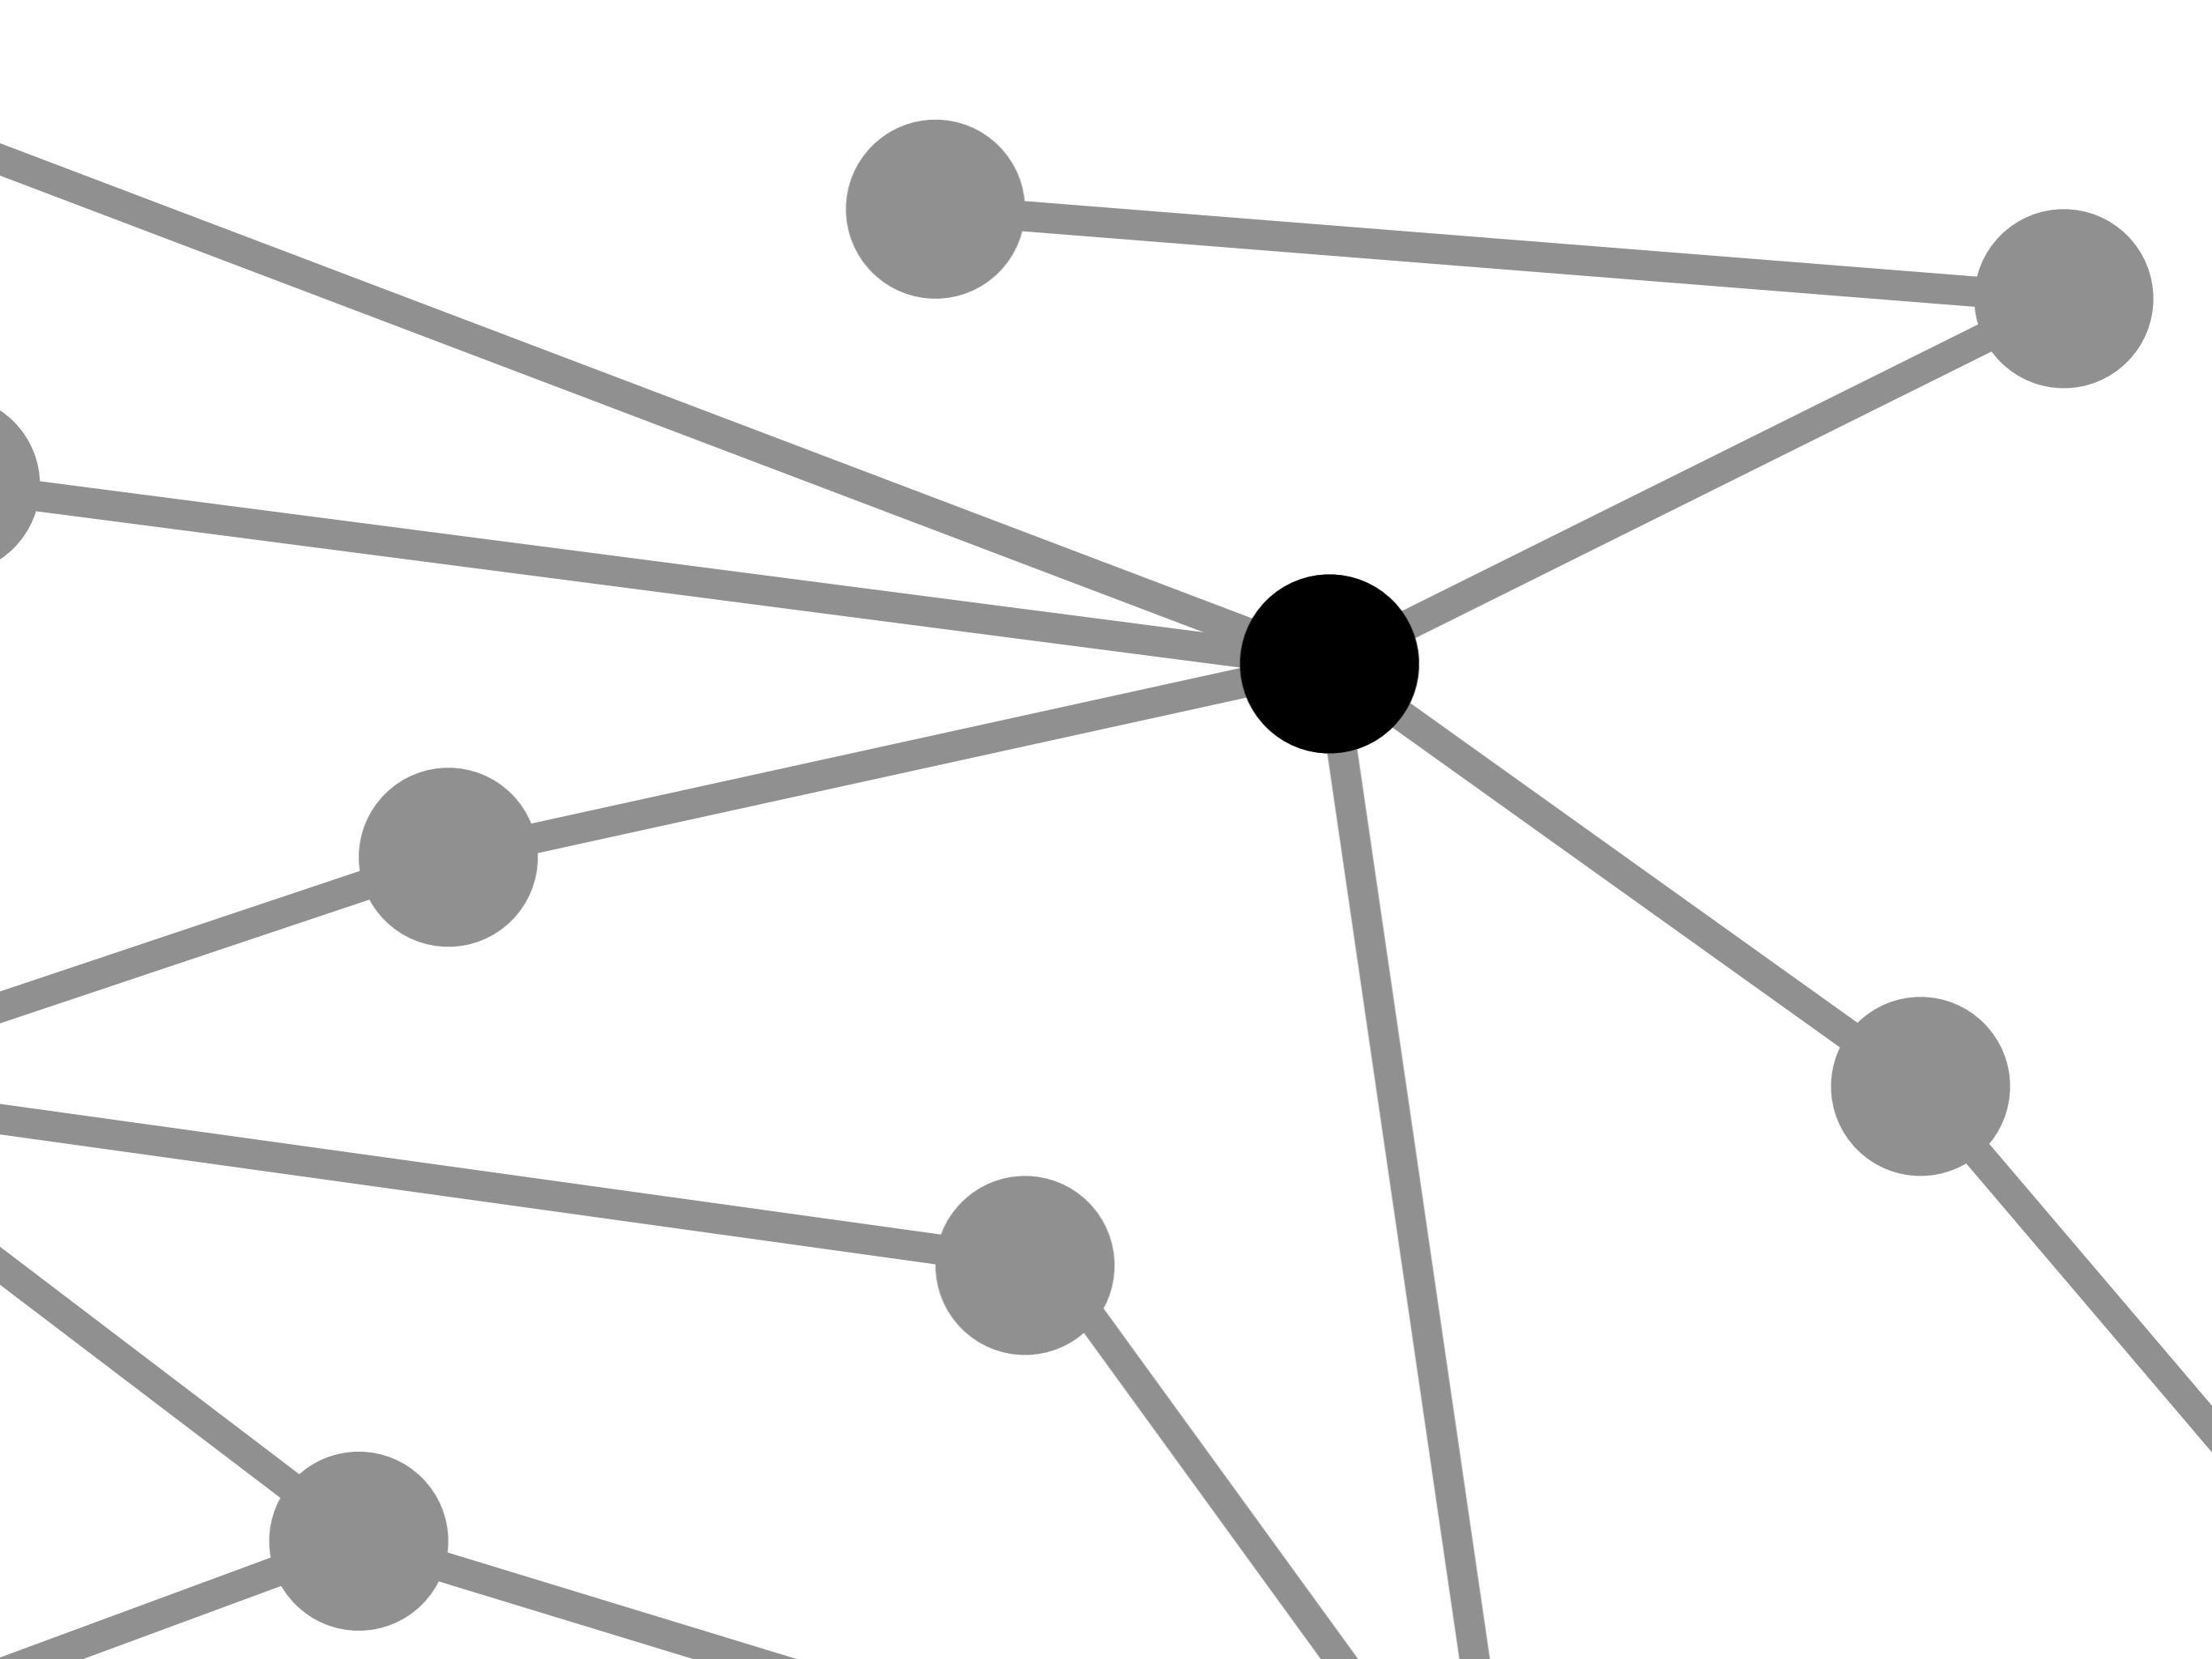

tools

journals

special collections

authority files

dbpedia

LOD hubs

geonames

ePrints

BBC music

dbpedia

bibliographic hubs

lcsb

the open library

GND

authoritative

why are hubs used?

large

content rich

free & open

(i.e. the same as other popular hubs)

PDDL

what should we create?

easy to understand

full content with links

up-to-date & relevant

however...

business data?

paid content?

export or sole format?

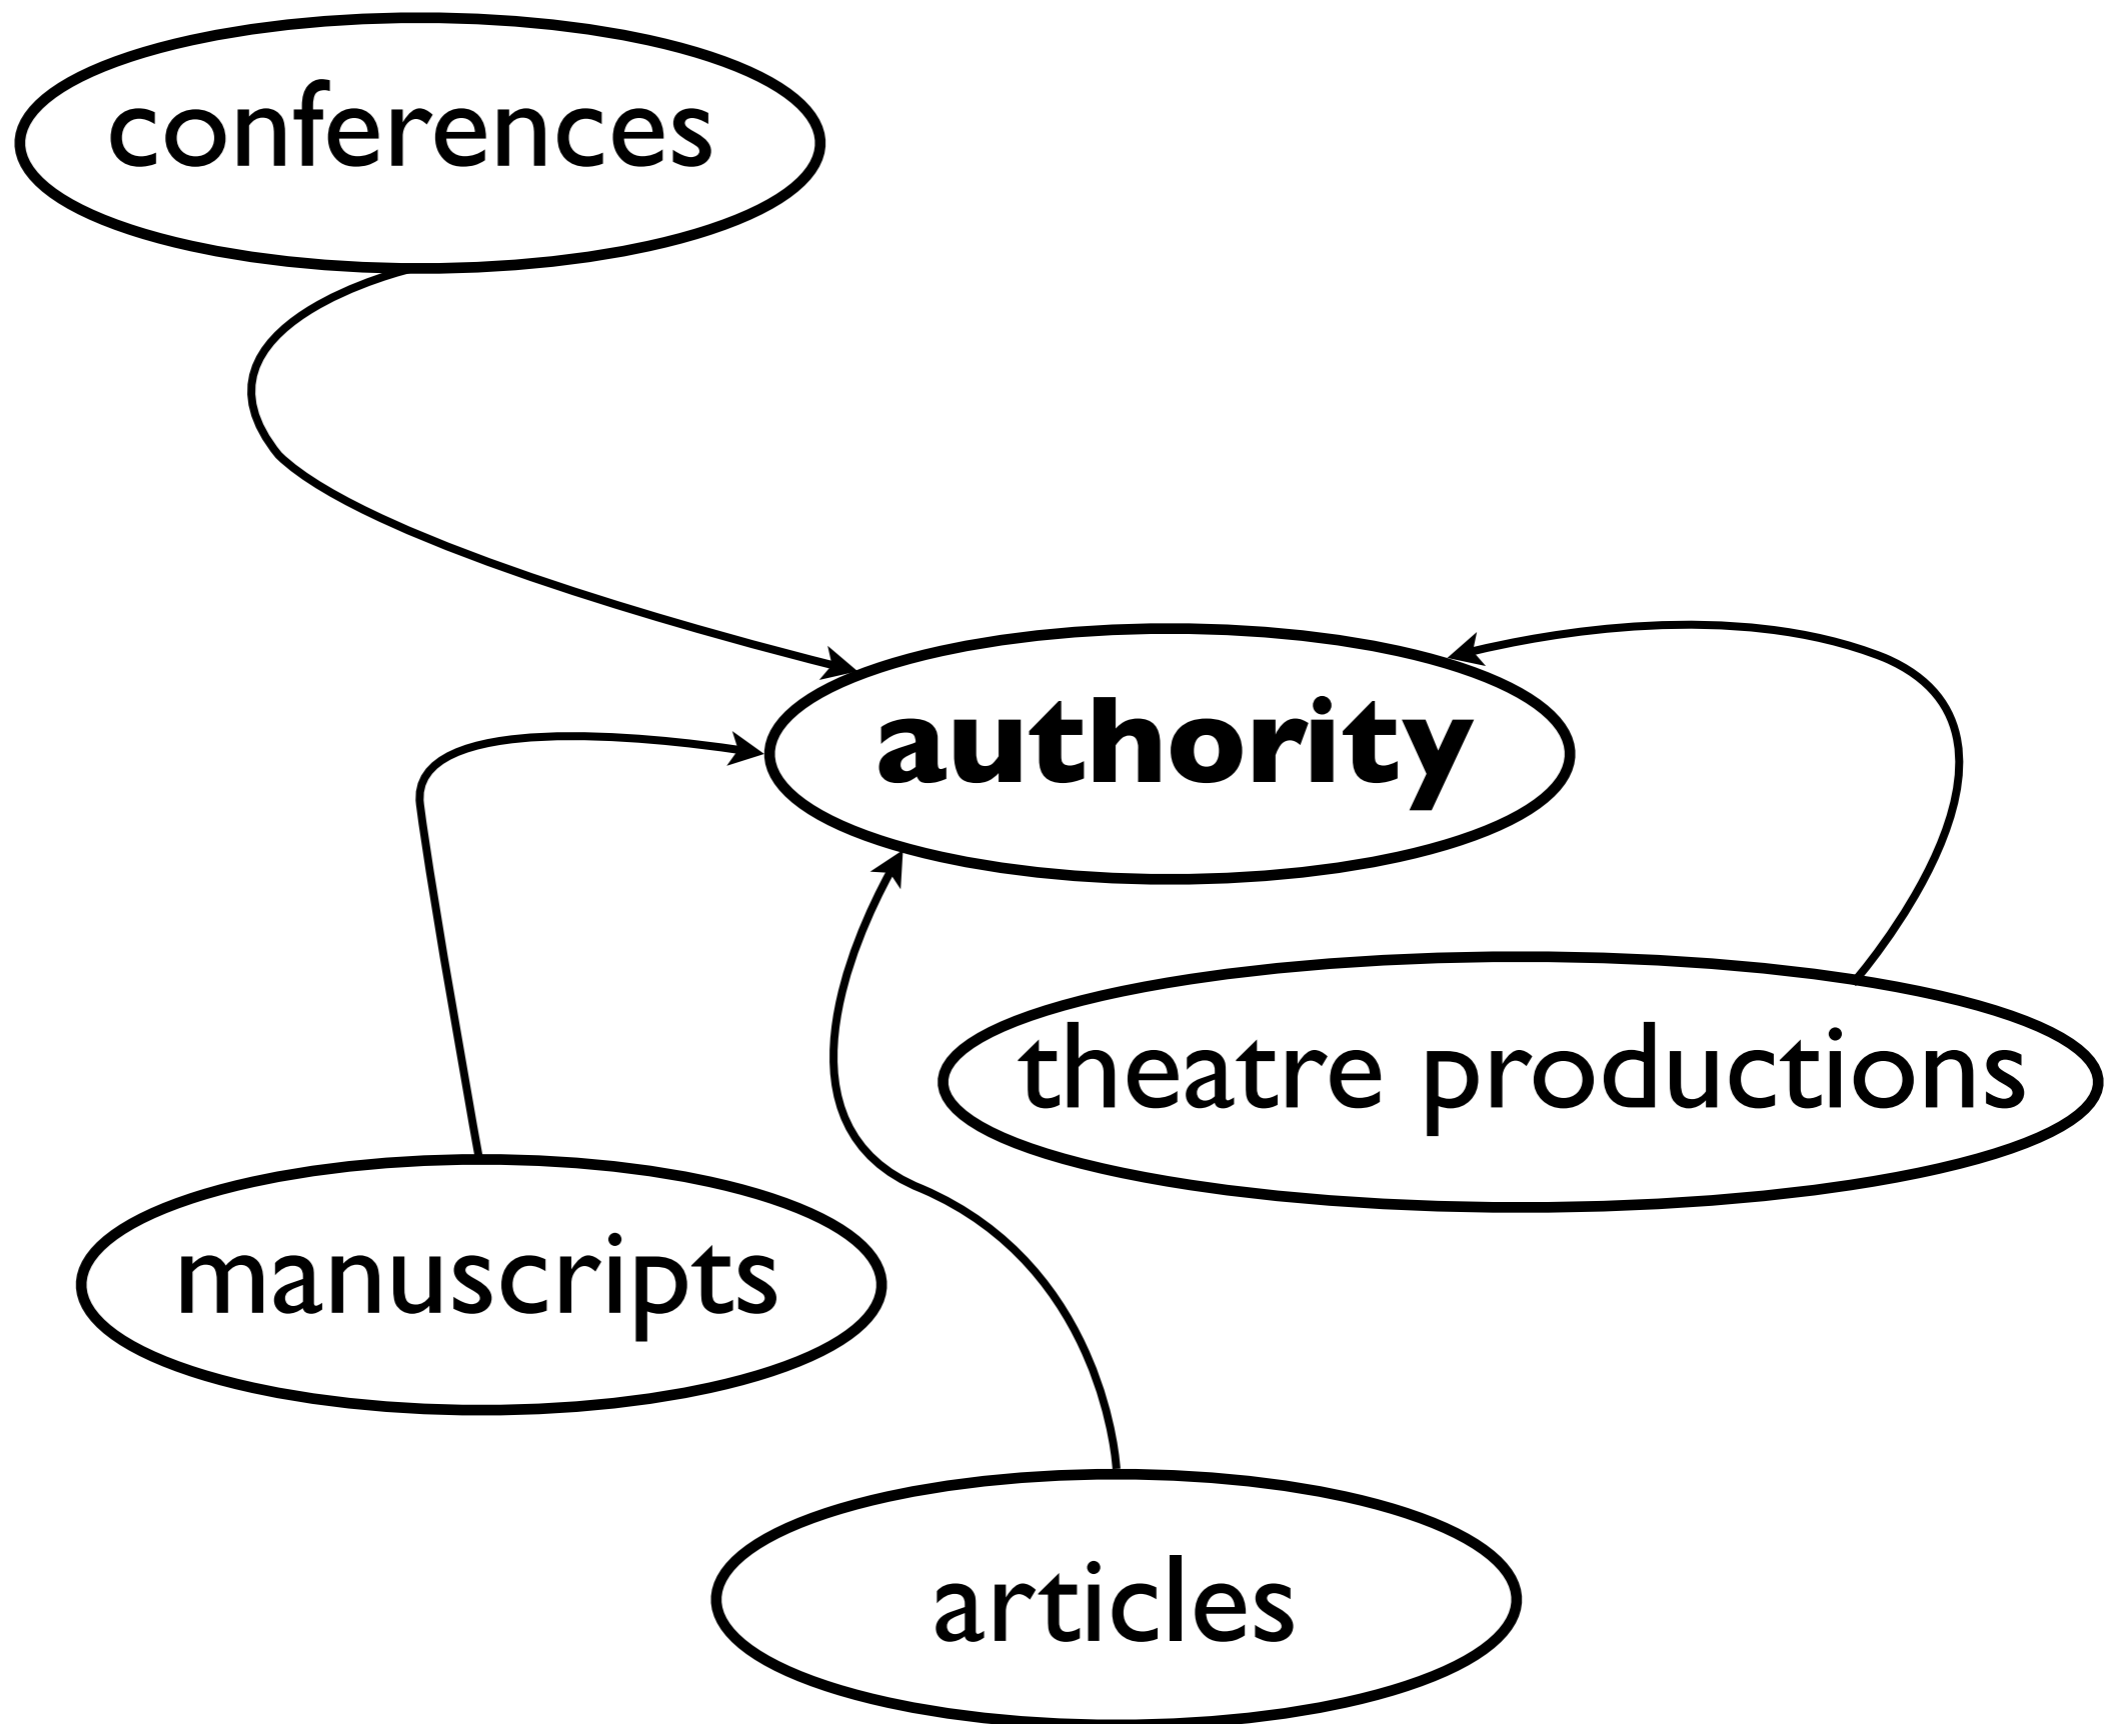

conferences

linking to authorities

theatre productions

manuscripts

articles

biography

content in authorities

other authorities

bibliography

content

CV biography domains collaborators
 impact factor political affiliations

personal authorities

funding sources other authorities

bibliography reading age

person-as-subject content ...

point of reference for people

personal authorities

provide context for others

biography

content

thank you!
