

- DIGITALIZATION OF THE OIL AND GAS INDUSTRY -

SEMANTIC DAYS

20TH-21ST MAY 2014

Conference for major new improvement in integrated work processes and knowledge management.

Digitalization of the oil and gas industry

Radisson Blue Atlantic Hotel, Stavanger, Norway. May 20 - 21, 2014

Semantic Days 2014 present the joint industry project Integrated Lifecycle Asset Planning (ILAP). ConocoPhillips initiated the project and the founding sponsors are ConocoPhillips, ENI Norge and Statoil. Lundin become a member of ILAP in 2014.

ILAP is a standard for efficient transfer of planning data between systems/organizations and it introduces High Quality Planning:

- *Project execution planning and reporting for all phases including Engineering, Procurement, Construction, Installation and offshore Hook-up & Commissioning*
- *All offshore work in one schedule (drilling, operation, M&M, projects, well services etc.)*
- *Long term planning - high level schedules*
- *Medium term planning - network/activity level schedules*
- *Short term planning - work order level*
- *Early definition of:
offshore hot work and work above open sea
what require to be done in a shut down
pre-shut down, shut down and post shut down activities*
- *Reductions and optimizations of simultaneous activities in an area*

EPIM manages the ILAP project and PCA perform the standardization work.

The purpose of the Semantic Days Conference is to deliver value to the industry and to the public sector by promoting semantic technologies for improved collaboration and knowledge management and by bringing people together in a forum that supports learning, networking and business development.

We are looking forward to an inspiring conference with challenging discussions in Stavanger, 20 - 21 May 2014, and hope to see you there. Take the opportunity to bring your colleagues to this venue. If you consider co-locating a project meeting with the conference please let us know.
